Controls

You must complete each course in the time limit without running out of the fuel to qualify for the next course. At the start of the race use the left/right controls to run to your ATV. Then jump onto it and start riding. Use the up/down controls to wheelie and left/right to accelerate/brake. You can also turn around to get a run up for a jump. Use the jump control to get extra lift when you go up a ramp and also to clear sharp edges without crashing. To get up steep surfaces wheelie slowly towards them and jump repeatedly to climb up.

If you crash and come off your ATV press jump to get up, run back to your ATV, face in the right direction and jump back onto it.
